

Parking Lot Management System

By: Eric Reyes
03-18-25

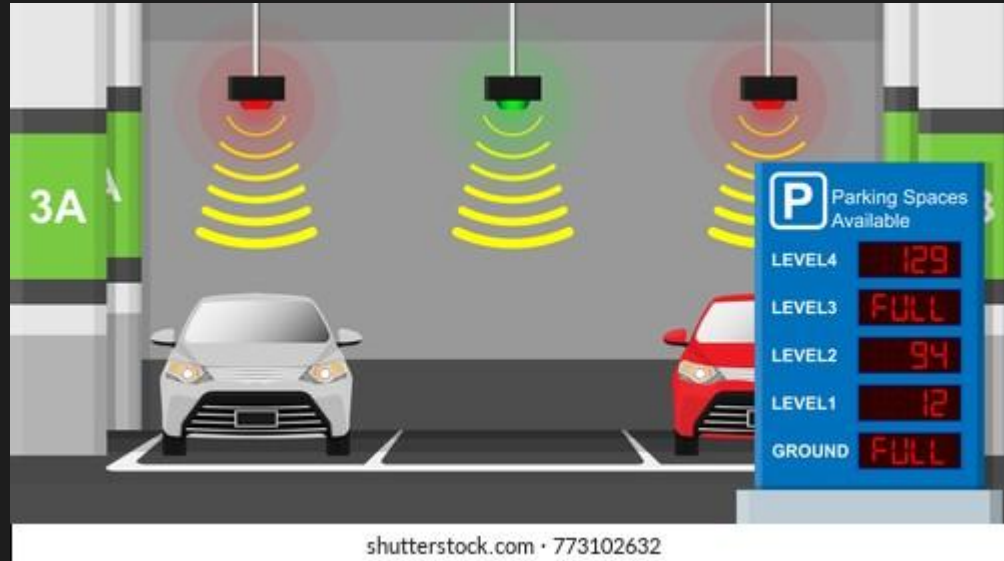

Target Users

1. **Parking lot managers** – who need to keep track of available spots, issue tickets, and process payments.
2. **Vehicle owners/users** – who can easily find available spots and make payments for their parking.”

Key Features

1. **Parking spot
assignment**
2. **Ticket generation**
3. **Payment processing**
4. **Availability
dashboard**

Roadmap of Presentation

Live Demo

Future Plans

- **Enhanced payment processing** – Integrating new payment methods for ease of use.
- **Real-time notifications** – For users, letting them know when a parking spot is available or when payment is due.
